The use of this Table is this, If thou wouldst know what the Interest of one hundred and five pounds is for nine moneths, at 6 per Cent. then in the first column find out 100 at the foot of the column, and right against it, under the title 9 mon. (which is the fifth column) there you shall find 4 l. 10 s. and against the number 5 l. you shall find 4 s. 6 d. so that the Interest of 105 l. for 9 mon. cometh to 4 l. 14 s. 6 d. the like of all the rest.

This moneth ſet, and lay Quicksets and Roſes, as all other plants, ſet and plant Vines, Hops, and all fruit that grows on bushes: Sow peaſe, beans, and onions, furniſh your gardens with ſallads and potherbs for Summer; prune and trim all ſorts of fruit trees from Moſſe Canker, and ſuperfluous branches, remove grafts or young trees, in the laſt quarter, the Moon being in Aries, Libra, or Scorpio.

If neceſſity urge, you may let blood, but be ſparing in Phyſick, and be ſure when a warm day comes, to prevent taking cold, through careleſſeneſſe, for the warm air this moneth is not laſting, but oft deceive us to our prejudice.

This moneth ſow hemp and flax, pole hops, ſet and ſow all kinds of Garden Herbs; reſtore the liberty of the laborious Bee by opening her Hive, Bark Trees for Tanners: and let good Huſwives mind their Gardens, and begin to think of their Maries.

In gardening never this rule forget,
To ſowe dry, and ſet wet.

The uſe of Phyſick becomes now ſeaſonable, as alſo purging and bloud-letting, 'tis good to abſtain from wine, for many diſeaſes will be taken thereby, to the ruine of many.

Get Rue, Wormwood and Gall, to ſtrew on your flowres to deſtroy fleas, at the full Moon gather flowers and ſeeds, dry your flowers rather in the ſhade than in the Sun, which too much exhaleth their vertue, but to avoid corruption, let the Sunsbeat a little vpon them.

Beware of violent heat, and ſudden cold, which are the great diſtempers of this moneth, and produce peſtilential diſeaſes, forbear ſuperfluous drinking, but eat heartily.

Now with thankfulneſſe reap your deſtred harveſt. Sow Winter Herbs in the new of the moon. Eſteem fair weather as pretious; and miſpend it not. Gather Garden ſeeds nær the Full; Uſe moderate diet, forbear to ſleep preſently after meat: take heed of ſudden cold after heat.

Beware of Phyſick and bloud-letting in the Dog-dayes, if the aire be hot, otherwiſe, if occaſion require, you may ſafely make uſe thereof.

Sow wheat and Rie, remove young plants and trees about the New Moon, observing this as a seasonable secret, that in setting you carefully place that side to the South and East, which were so before you took up the plant, otherwise the cold kills it: gather your remaining winter fruit, set all kinds of Nuts and Acorns, and cut Hoste-trees but once in two years, if you intend to have store of Hoses.

The garments you last month hung on your backs in Jest, now button them close in good earnest; cloath you now for prevention, for the Cold comes in sensibly, and fogs oft times beget a whole winters cold. Consult with your Tailors as well as Physicians.

A Description of the four Quarters of the Year.

The Spring begins March 9, at six in the afternoon; at whi time the Sun entreth the Equinoctial sign Aries, causing an Equa ty of day and night all the habitable world over.

Summer takes beginning June 10; Nine hours post meridie the Sun then approaching our Zenith, makes longest dayes a shortest nights on this side the Equator.

Autumn, or Harvest quarter begins, the sun entring the s scruple of Libra, which this year is the 12 of September, a equalizing day and night.

Winter begins December 10, a little before midnight, the then entring the Tropical sign Capricorn, making then the shor day and longest night in the year on this side the Equator, as the longest day and shortest night to them who inhabit the s tract of the Line.

Of the Eclipses happening th present year, 1664.

THere will be four Eclipses this year, two of the sun and tw the Moon, but both of the Sun so small and inconsiderable, Argoll takes no notice of the first, nor *Eichstadius* of the sec those two of the Moon will be to mil; yet but only the half be seen in our Horizon.

The first of the Moon will be very great, the will be long totally darkened, on the first day of F ary, half an Hour past two in the afternoon; the Moon being under the Earth, will not at all be een of us, but those tha in *Tartaria*, *China*, and the Easter Couuntries; those shall in their Meridian, who inhabit East of us, 9 Hours 34 Min. &

The second Eclips of the moon, will be on Wednesday th of July, the beginning will be at 25 min. past 9 at night, th at almost half an hour after one in the morning, the whole du will be 4 Hours; the moon will be totally dark an Hour and very formidable Eclipse; the Moon will suffer this in A Evill significaion to *London*, as Fires, Mutinies, Head-strong A which I pray God avert, and the Goventment be careful to pre t will Eclipse her honour.
